

Boiler Room Open Days & Mission 2007

The communities side of 24-7 Prayer movement seems to be growing ever more rapidly. We now think there are more than 30 active communities worldwide, maybe more. In June, 'Punk Monk' the story of Boiler Rooms will be published in the US, with the book expected out in the UK in early 2008.

With all this happening, we've wanted to create some focused opportunities to discover more about Boiler Rooms – to learn about values, to see them in operation first-hand and to make available training. So, please find below three chances to connect
